Work Experience

Andrade & Nunes – Company Services
Intelligent Automation Consultant / Owner
May/2022 – Now

Responsible for developing Automations using several frameworks.

Client: ALGECO (France) – Creation, Maintenance and Run of automation for migrating Data between Legacy system and Salesforce, using Robocorp Framework and Salesforce APIs;

Client: BI4ALL (Portugal) - Development of Proof of Concepts (POC) for RPA using Power Automate and Robocorp; Creation of Document Templates for CoE (Assessment, PDD, SDD, UAT documentation); Content Generation for Client's Website about Hyperautomation; Presentation of RPA Fundamentals for Tomorrow/22 event.

Nestlé (NESN)
Senior Automation Developer
Feb/2022 – Jul/2023

Automation Developer for Projects in Latin America and Europe, Specialized in Blue Prism RPA.

Achievements
- Implemented a methodology to handle Large files using Blue Prism and OLEDB, reducing processing time from Hours to Minutes without memory overflow.
- Developed Native Libraries for automations using Powershell, Javascript and Python.
- 13 robots deployed to PROD between 2022 and 2023, saving more than 13 FTEs per year.

Deloitte Touche Tohmatsu Limited (DTTL)
Intelligent Automation Senior Consultant
Nov/2021 – Feb/2022

Consultant Specialized in RPA Automations and IT Projects.
- Development of an IOT Platform for monitoring Cancer Patients using NodeJS.

International Business Machines (IBM)
Automation Developer
Jan/2017 – Nov/2021

Full Stack RPA developer (Blue Prism/WDG/Python) for Global Projects (EMEA, US, CA, LA, ASIA)
Responsible for the Full cycle of project: Assessment, PDD approval, Architecture, Development, Testing (UAT), Documentation (SDD), Deployment and Maintenance Control.

<u>Achievements</u>

- 14 robots deployed to PROD following ASCA Audit requirements between 2020 and 2021, saving more than 78K hours per year.
- Automation of several processes using VBA and SQL, like a tool to analyze taxes and an automatic KPI dashboard, saving more than **96%** per day in processing time and increasing overall accuracy of the process in more than **50%**.

Water and Sewer department of Santa Bárbara D'Oeste (DAE-SBO)
Administrative Agent for Accounting and Treasury – Reporting Tools
Jun/2015 – Dec/2016

Creation of adhoc reports for Executives using SQL (SQL/PL), advanced Excel and Tableau.

<u>Achievements</u>

- Development of a reconciliation methodology for taxes **100%** accurate using group set theory;
- Automation of the AUDESP audit report using programming language in VBA, incrementing the process efficiency in **83%**;
- Design of a tool for bridging data between different files in excel using 1 click only, helping employees with eye disabilities and improving the process efficiency in **95%**.

International Business Machines (IBM)
Credit Control Desk analyst for North America (USA and Canada)
Jan/2012 – Oct/2014

Support to clients in North America related to IT Contract Management

<u>Achievements</u>

- Creation of an automatic procedure for code generation **7X** faster than the original system using VBS programming language;
- Standardization of a Cost Center System to support a new company acquired by IBM (Toshiba), working together with teams in USA and Europe
